👤 PROFILE

Hi, I'm **Iftekhar Ahmed**, a Web Developer and Penetration Tester with over **6 years of experience in web development** and **3 years of experience in penetration testing and cybersecurity**. I focus on building modern, secure, and scalable web applications.

My development stack includes **PHP, Laravel, HTML, CSS, JavaScript, MySQL, and Next.js**, which I use to create responsive websites and full-stack web applications. Alongside development, my experience in **penetration testing** helps me design systems with a strong focus on security and best practices.

I studied at **RK Government High School**, where I developed a strong interest in technology and programming. Since then, I have continuously improved my skills through practice, projects, and real-world experience.

I enjoy creating modern websites and full-stack applications that are fast, reliable, and user-friendly. Currently, I am open to **freelance and remote work opportunities**, where I can contribute my development and security expertise to build high-quality and secure web solutions.

💼 PROFESSIONAL EXPERIENCE

Developer & / Graphic Designer, ITB Tech

Developed and maintained web applications, focusing on responsive design, performance, and clean backend architecture.

02/2024 – 05/2024
Remote

Full Stuck Dveloper, Eprottoy

Developed and maintained modern full-stack web applications using PHP, Laravel, JavaScript, and MySQL. Built responsive user interfaces, implemented backend systems, and ensured application performance and security.

03/2026
remote

Web Developer & pentester, Ulatat

Worked on developing secure full-stack web applications and performing penetration testing to identify and fix security vulnerabilities.

08/2025
Reomte

PROJECTS

Ulamat.site, Scholars Platform

08/2025 – Present

Ulamat is a modern web platform where I worked as a **Full Stack Developer and Penetration Tester**. The project involved developing secure and scalable web applications while ensuring strong protection against common web vulnerabilities. I was responsible for building both **frontend and backend systems**, implementing database structures, and improving overall application performance. In addition, I conducted **penetration testing and security assessments** to identify vulnerabilities such as XSS, SQL injection, and authentication weaknesses, and applied fixes to strengthen the platform's security.

Technologies Used

- PHP
- Laravel
- JavaScript
- HTML & CSS
- MySQL

Key Contributions

- Developed core backend features and APIs
- Built responsive frontend interfaces
- Performed security testing and vulnerability assessments
- Improved system performance and stability

AWARDS

President Scout, Bangladesh Scouts

Community Development Award, Bangladesh Scouts

Web Master, WebHaat

EDUCATION

School, Govt. R.K. High School

01/2022 – Present
Mymensingh, Bangladesh
